## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. An item in the information disclosure statement filed 29 April 2008 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because it does not include a publication date (Non-Patent Literature item 10). It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

### ***Allowable Subject Matter***

2. Claims 1-15 are allowed.
3. The following is an examiner's statement of reasons for allowance:

With respect to claims 1, 5, and 6, the prior art fails to disclose or reasonably suggest the formation of a radiation detection crystal made from a compound comprising  $\text{Cd}_x\text{Zn}_{1-x}\text{Te}$ , where  $0 \leq x \leq 1$ ; the element Ruthenium, the element Osmium, or a combination thereof; and an element from column II or column VII of the periodic table of the elements (in the case of claims 1 and 5) or a dopant that adds shallow level donors to the top of an energy band gap of the mixture when it is solidified (in the case of claim 6). While these doping techniques have been used with InP materials

(applicant's admitted prior art, specification, paragraphs [0004]-[0006]), it would not have been obvious to one having ordinary skill in the art at the time the invention was made to apply such techniques to CZT-type crystals, due to their materially different structure and properties.

Further, the prior art only teaches the use of Ruthenium or Osmium as a structural material for a chamber in which crystals are grown (D'Evelyn *et al.*, US 2007/0181056 A1, paragraph [0022]) or as a material used in an electrode external to the CZT material (Dausch, US 2004/0046123 A1, paragraph [0039]).

Claims 2-4 and 7-15 are allowable for reasons of dependency upon the claims addressed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
